### Objective:

Motivated and enthusiastic full-stack developer with a solid foundation in back-end and front-end technologies. Proficient in Core Java, Java EE (Servlets, JSP), Spring Boot, Angular 15, and recently acquired skills in Python, Content Stack, and AWS. With 5 months of professional experience and a continuous learning mindset, I am eager to contribute innovative solutions to a dynamic development environment.

### Education:

Qualification	Year	Institution Name	Percentage/GPA
B.Tech	2022	Sagi Ramakrishnam Raju Engineering College	7.34
Intermediate	2018	Sri Chaitanya Junior College	88%
X	2016	Sri Chaitanya Techno School	9.0

### Work Experience:

**Associate Software Engineer**  
**Hinduja Global Solutions Ltd**  
**Feb 2024 – Jul 2024**

- Developed and maintained web applications using Python.
- Integrated Content Stack for content management.
- Collaborated with cross-functional teams to deliver high-quality software solutions.
- Improved application performance and user experience through efficient coding practices.

### Projects:

#### Angular Web Application:

- Developed a responsive web application using Angular, implementing lazy loading for optimal performance and user experience.
- Implemented user authentication functionality using REST APIs, ensuring secure login and registration processes.
- Utilized Angular features such as interceptors, services, templates, reactive forms, and layouts to enhance the application's functionality.

- Collaborated with the development team to integrate front-end components with back-end functionality

#### **Spring Boot REST API:**

- Prepared the project by downloading the Spring Boot project from Spring Initializer.
- Configured the required dependencies in the project's pom.xml file.
- Organized the project structure by creating separate packages, including entity, DTO, controller, repository, service, service implementation, and security.
- Implemented REST API endpoints for managing user details, using Spring Data JPA for efficient database interaction.
- Ensured proper handling of requests and responses, incorporating best practices for security and utilizing JWT tokens for authentication.

#### **Technical Skills:**

- Back-end : Basic knowledge of Core Java,Java EE(Servlets,JSP),SpringBoot(REST API's,Microservice)
- Front-end : Basic knowledge of HTML5,CSS3,JavaScriptES6,Bootstrap,Angular15
- Database : Basic knowledge of MySQL,SQL
- Cloud : Basic knowledge of AWS
- CMS : Basic knowledge of Content Stack
- Version Control: Basic knowledge of GIT

#### **Certifications:**

##### **Introduction to Front-End Development – Coursera:**

Completed an online course on front-end development, gaining a solid foundation in HTML, CSS, and JavaScript.Developed skills in creating responsive and interactive web interfaces.

##### **Version Control – Coursera:**

Successfully completed a course focused on version control systems, specifically Git.Learned best practices for collaborating on projects, managing code repositories, and tracking changes.

##### **Programming with JavaScript – Coursera:**

Gained proficiency in using JavaScript for web development and building dynamic web applications.

*I am here declare that the above information is true the best of my knowledge*
